

The **International Conference on Computational Fluid Dynamics (ICCFD)** is a leading biennial event dedicated to all innovative aspects of **computational fluid dynamics**, both fundamental and applied.

It was established in 2000 through the merger of two major conferences:

- the International Conference on Numerical Methods in Fluid Dynamics (**ICNMFD**);
- the International Symposium on Computational Fluid Dynamics (**ISCFD**).

Since then, 12 editions have been held, rotating among the Americas, Asia-Oceania, and Europe - where the thirteenth edition will take place. **ICCFD13** will bring together scientists, researchers, and engineers from around the world to exchange ideas and present cutting-edge research.

Venue  
details

Guidelines  
for submission

## Submit your abstract & Mini-symposium proposal

Deadline for Minisymposium proposals..... **December 23, 2025**

Abstract submission deadline..... **January 26, 2026**

## Areas of interest

- Innovative methods for fluid dynamics
- Advanced multidisciplinary applications
- Flow physics modeling
- HPC: methods and architectures

## ICCFD Executive Board

- **Paola Cinnella** (Secretary),  
Sorbonne University, France
- **Mohamed Hafez** (Treasurer),  
UC Davis, USA
- **Remi Abgrall**,  
University of Zurich, Switzerland
- **Haechon Choi**,  
Seoul National University, Korea
- **Ko Fujii**, Tokyo University of Science, Japan

## Local Organizing Committee

- **Alberto Guardone**,  
Politecnico di Milano, Italy
- **Barbara Re**,  
Politecnico di Milano, Italy
- **David Zingg**,  
University of Toronto, Canada
- **Christoph Brehm**,  
University of Maryland, USA
- **Shishir Pandya**,  
NASA Ames Research Center, USA
- **Shigeru Obayashi**,  
Tohoku University, Japan
- **Makoto Tsubokura**,  
RIKEN R-CCS / Kobe University, Japan
